

StorARCH: Secure Digital Storage, Archival & Retrieval System

A Changing Data Landscape

In a continually evolving regulatory environment, businesses are challenged with the complex and expensive task of managing and controlling their data to ever increasing standards.

The introduction of General Data Protection Regulation (GDPR) revolutionised how data must be stored, managed and removed and increased the requirement to ensure data is easily and quickly accessible to our customers.

The cost of compliance with regulations has escalated as businesses struggle to embed cost-efficient processes that meet regulatory requirements, particularly when dealing with data in different formats and media, across interwoven systems, built up over many years.

Introducing StorARCH

The StorARCH Solution, from Krome Technologies is a secure cloud based digital storage and retrieval solution for data, documents, images and audio of almost any format.

An access-controlled, fully configurable user interface provides a simple-to-use yet powerful browser based search engine, with no requirement to download any client software locally, that allows users to instantly locate, view, redact and safely download archived data.

StorARCH provides an Enterprise Archive Solution for all of your data, improving operational efficiency, reducing costs and supporting compliance for the storage, control and safe deletion of your data during its retention lifecycle.

StorARCH: Features & Benefits

REDUCE YOUR COSTS

Bring together physical and digital data, documents, multimedia files, etc. into a single repository, enabling the decommission of costly legacy systems and physical data stores, retained only for the storage/retrieval of archive data.

DRIVE OPERATIONAL EFFICIENCIES

Optimise processes using a single, easy-to-search repository, streamlining retrieval, redaction and download processes. Reduce dead time in processes through the removal of physical data retrieval and handling processes.

IMPROVE CUSTOMER EXPERIENCE

Respond to requests more quickly and accurately, providing outputs in a consistent electronic format. Improve quality and avoid degradation through the conversion and storage of physical media, such as paper and microfiche.

PROTECT YOUR DATA

Disaster Recovery for all elements of the data, application and infrastructure supports your Business Continuity plans, with access to your data for colleagues from your contingency sites ensuring continuity in service.

COMPLIANCE FOR YOUR BUSINESS

Supporting you to meet your regulatory obligations, with adherence to all the latest data protection and security regulations. Increase your understanding and control over your data, including full access audit trails.

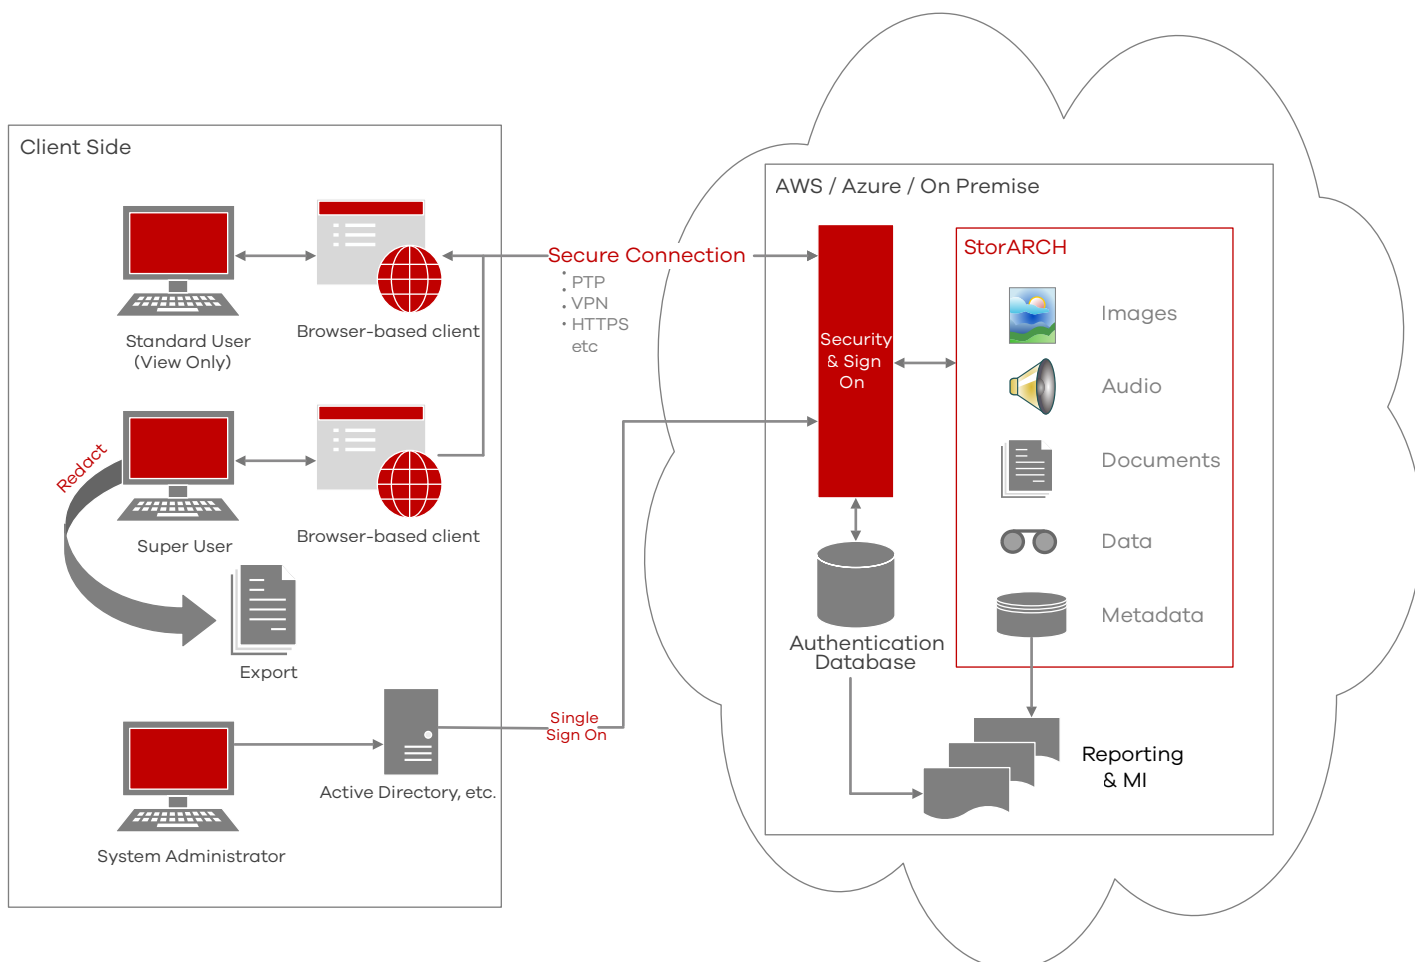

We had searched the market for a solution to meet our needs, but nothing quite hit the mark. StorARCH enabled us to meet all of our requirements without compromise.

Head of Architecture, UK Retail Bank

StorARCH: Solution Overview

StorARCH may be deployed in the Public Cloud (hosted by Krome or within your own account), as a Private Cloud solution within Krome's partner data centres, or hosted On Premise in your own Data Centres.

StorARCH: Bespoke configuration, built to meet your needs

Not every client requires the same StorARCH solution. Krome's StorARCH offering can be tailored and designed specifically to meet your organisation's individual requirements and your specific data archive, compliance and recovery objectives.

Support can be customised to fit with your organisation's needs, with options ranging from a full Software as a Service or Infrastructure as a Service, through to software licence only.

Whatever your chosen solution, our specialists can provide both consultancy and hands-on practical support in complex data extraction and conversion, supporting your transition from legacy to new technology. Selecting the most cost efficient architectural model to align with your technology strategy and achieve your business objectives can be complex. Krome can provide guidance on which model best fits your requirements.

Krome Technologies have a wealth of proven experience in designing and delivering innovative and bespoke solutions, to learn more about our StorARCH solution please contact us on 01932 232345 or email storarch@krome.co.uk.
